Robotics

## ● Week10 ~ Week 11 진행상황

**Sort tracking for strolling assistant**

Portforwarding & connection with server  
-> discussed on Backends section...

Minor changes – Navigation parameters change, emergency detection,  
robot design...

# 1 Robotics

- Sort tracking

What is sort tracking?

Purpose : To identify who is the user between humans

Method : Get bounding box from yolo and indexing them.

# 1 Robotics

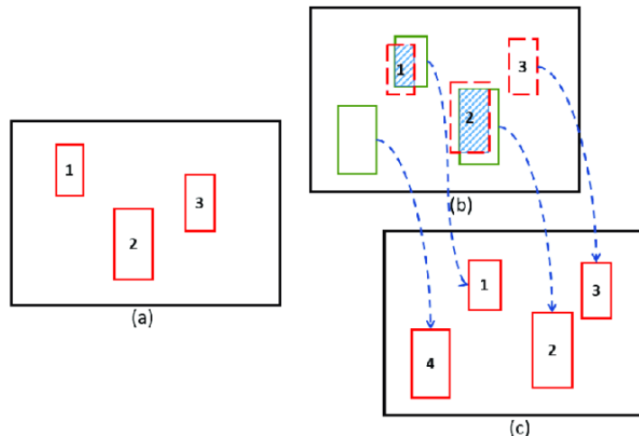

## ● Sort tracking

### Sort Tracking Algorithm

Prediction : Predict the expected bbox location based on current status of bbox

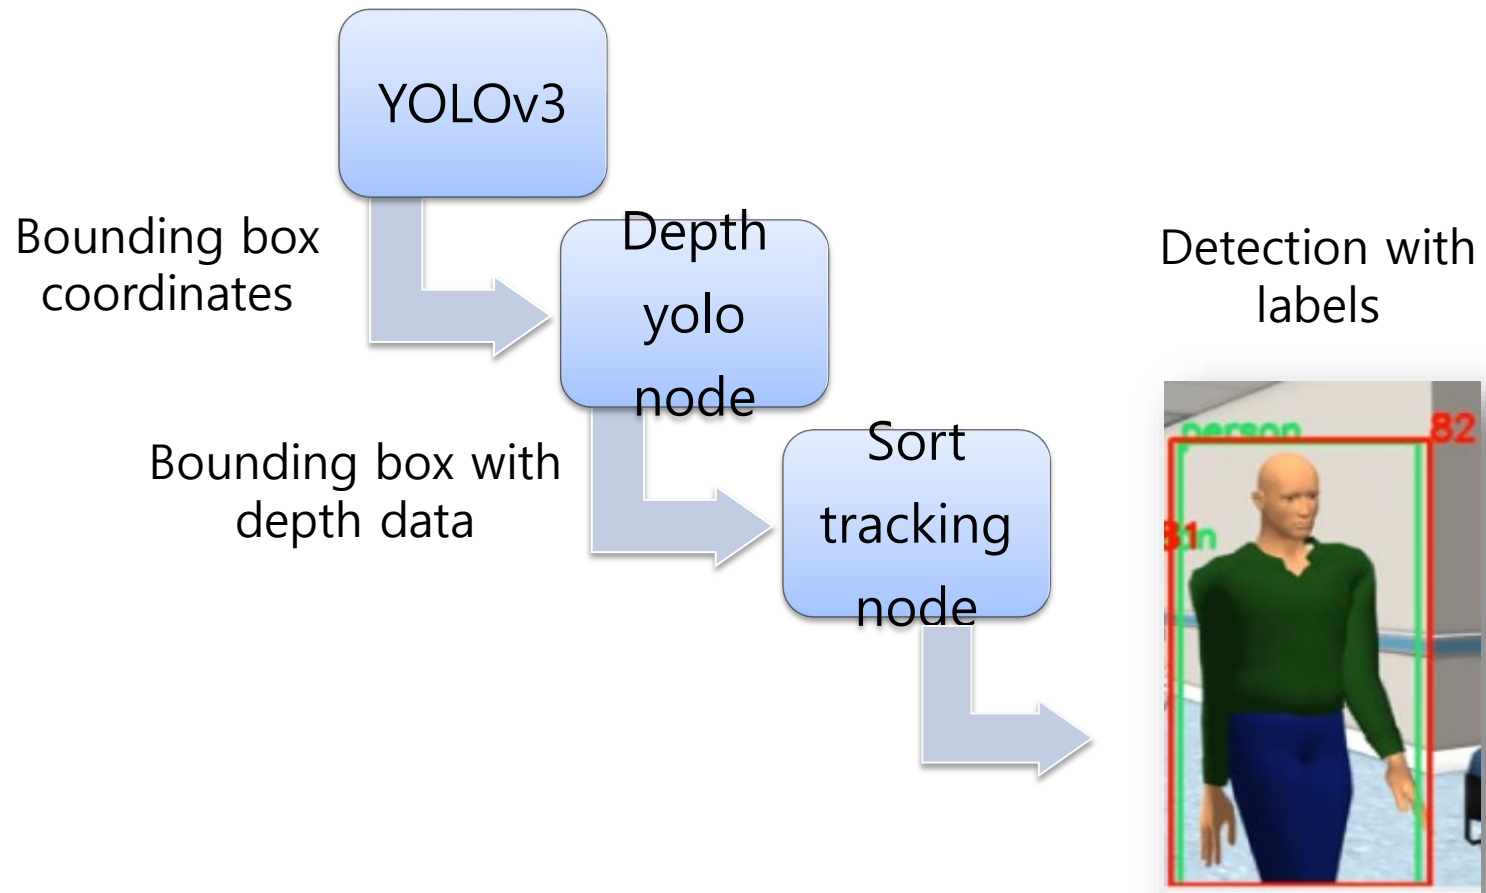

Hungarian Algorithm : Match prediction with real values

Figures from...

- Sort tracking

## Sort tracking structure

- Sort tracking

## Short demo

"Target\_actor" keep change as there are multiple people  
Set robot to target **nearest person** if it lost the target  
-> not 100% accurate

# 1 Robotics

## ● Future Work

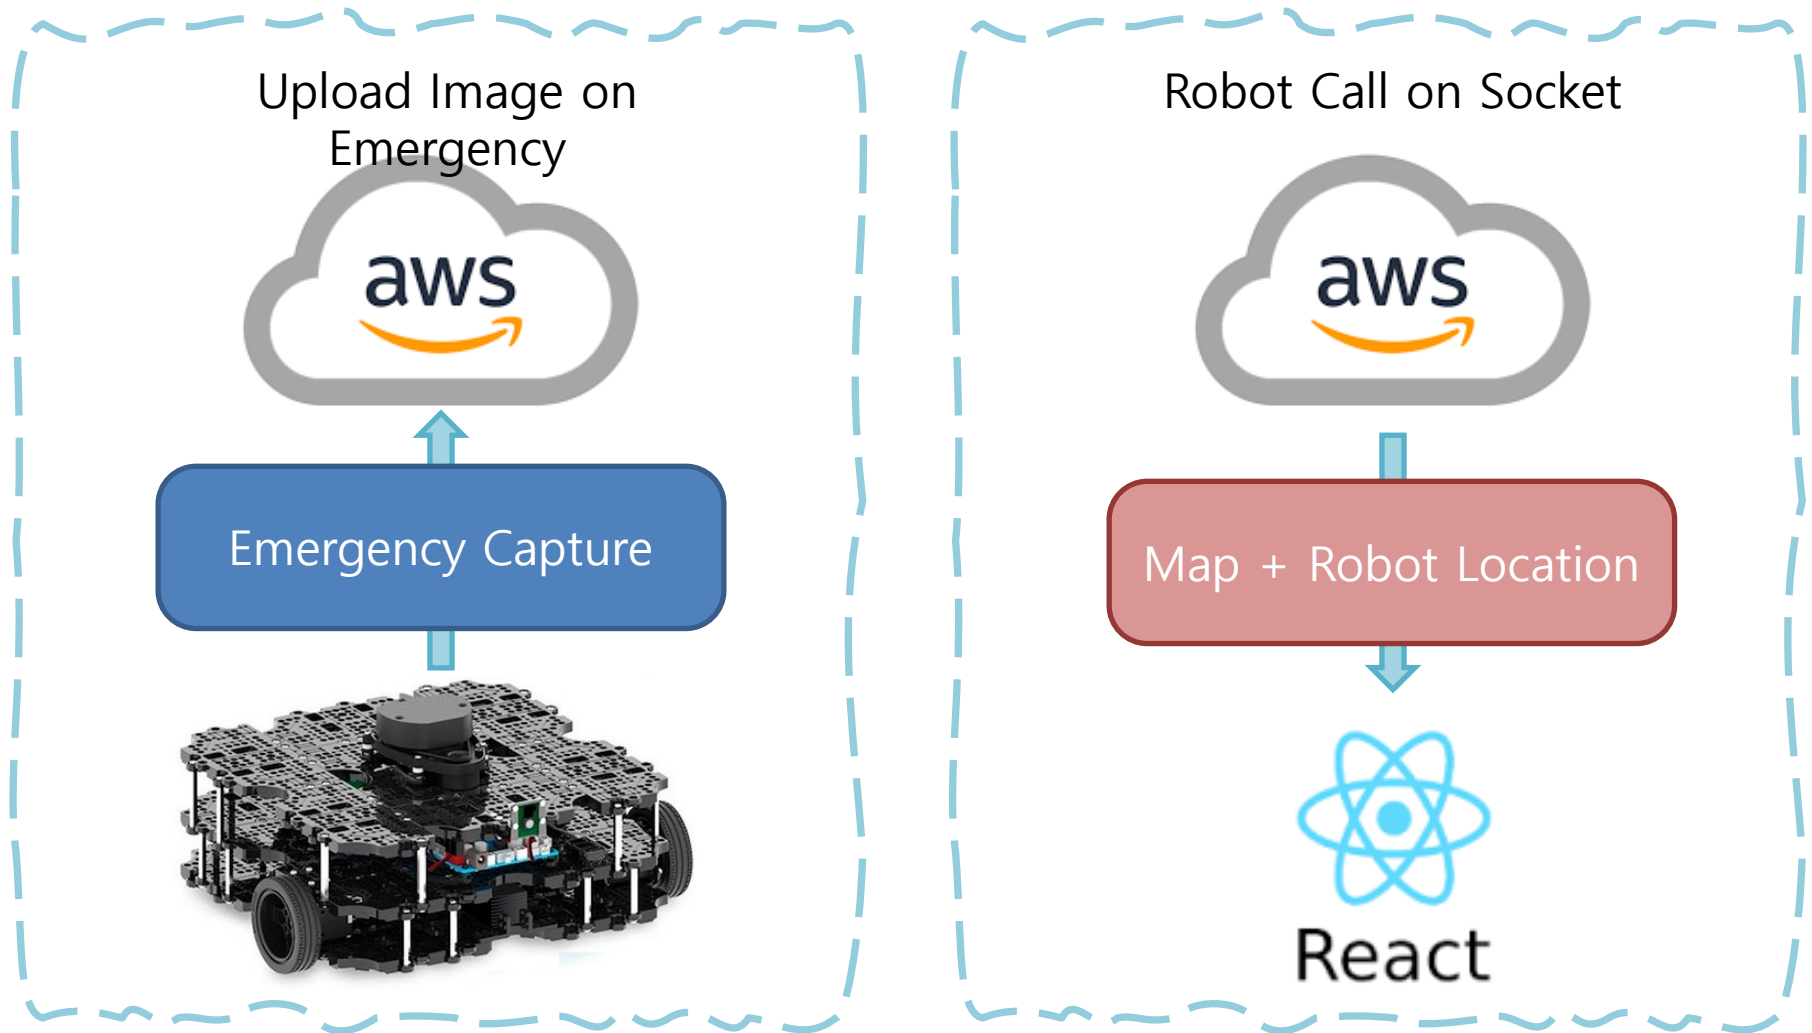

Somewhat inaccurate to use in demo -> keep making heuristic approach

Working with backends, connecting server and robots

Make scenarios of the demo videos of final presentations.

## 2 Back-End

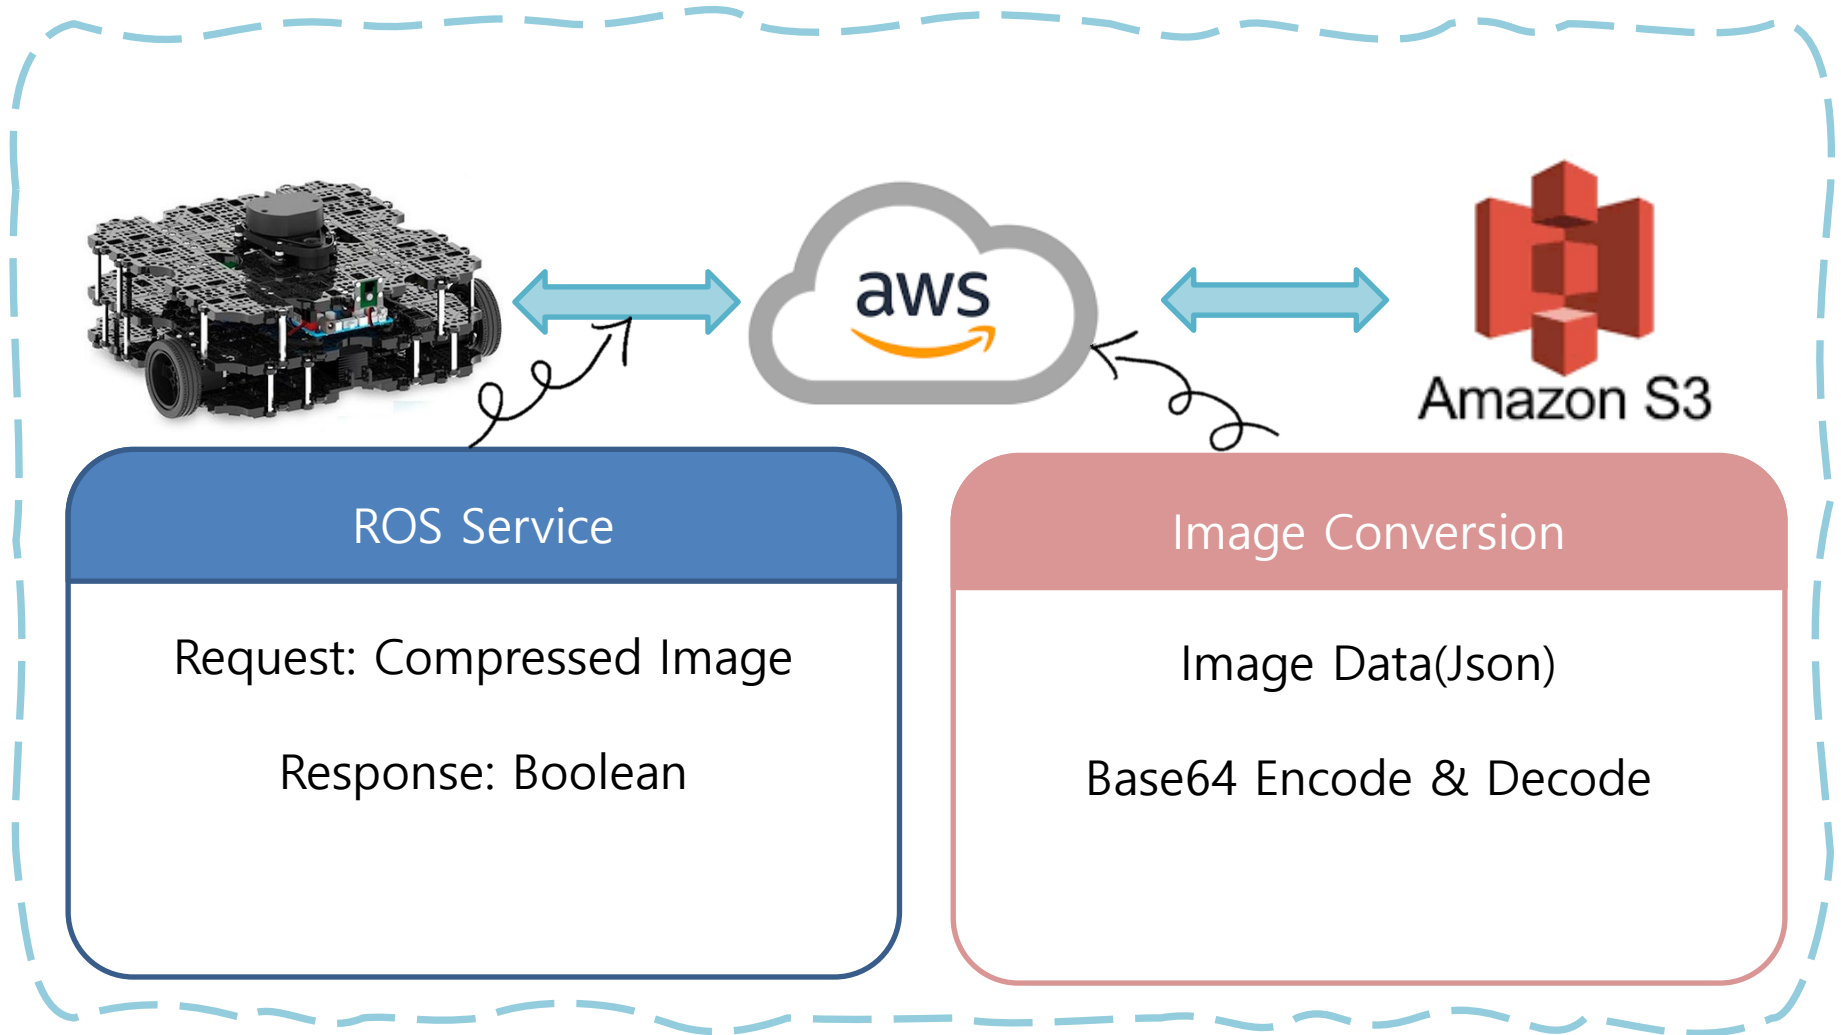

- Progress

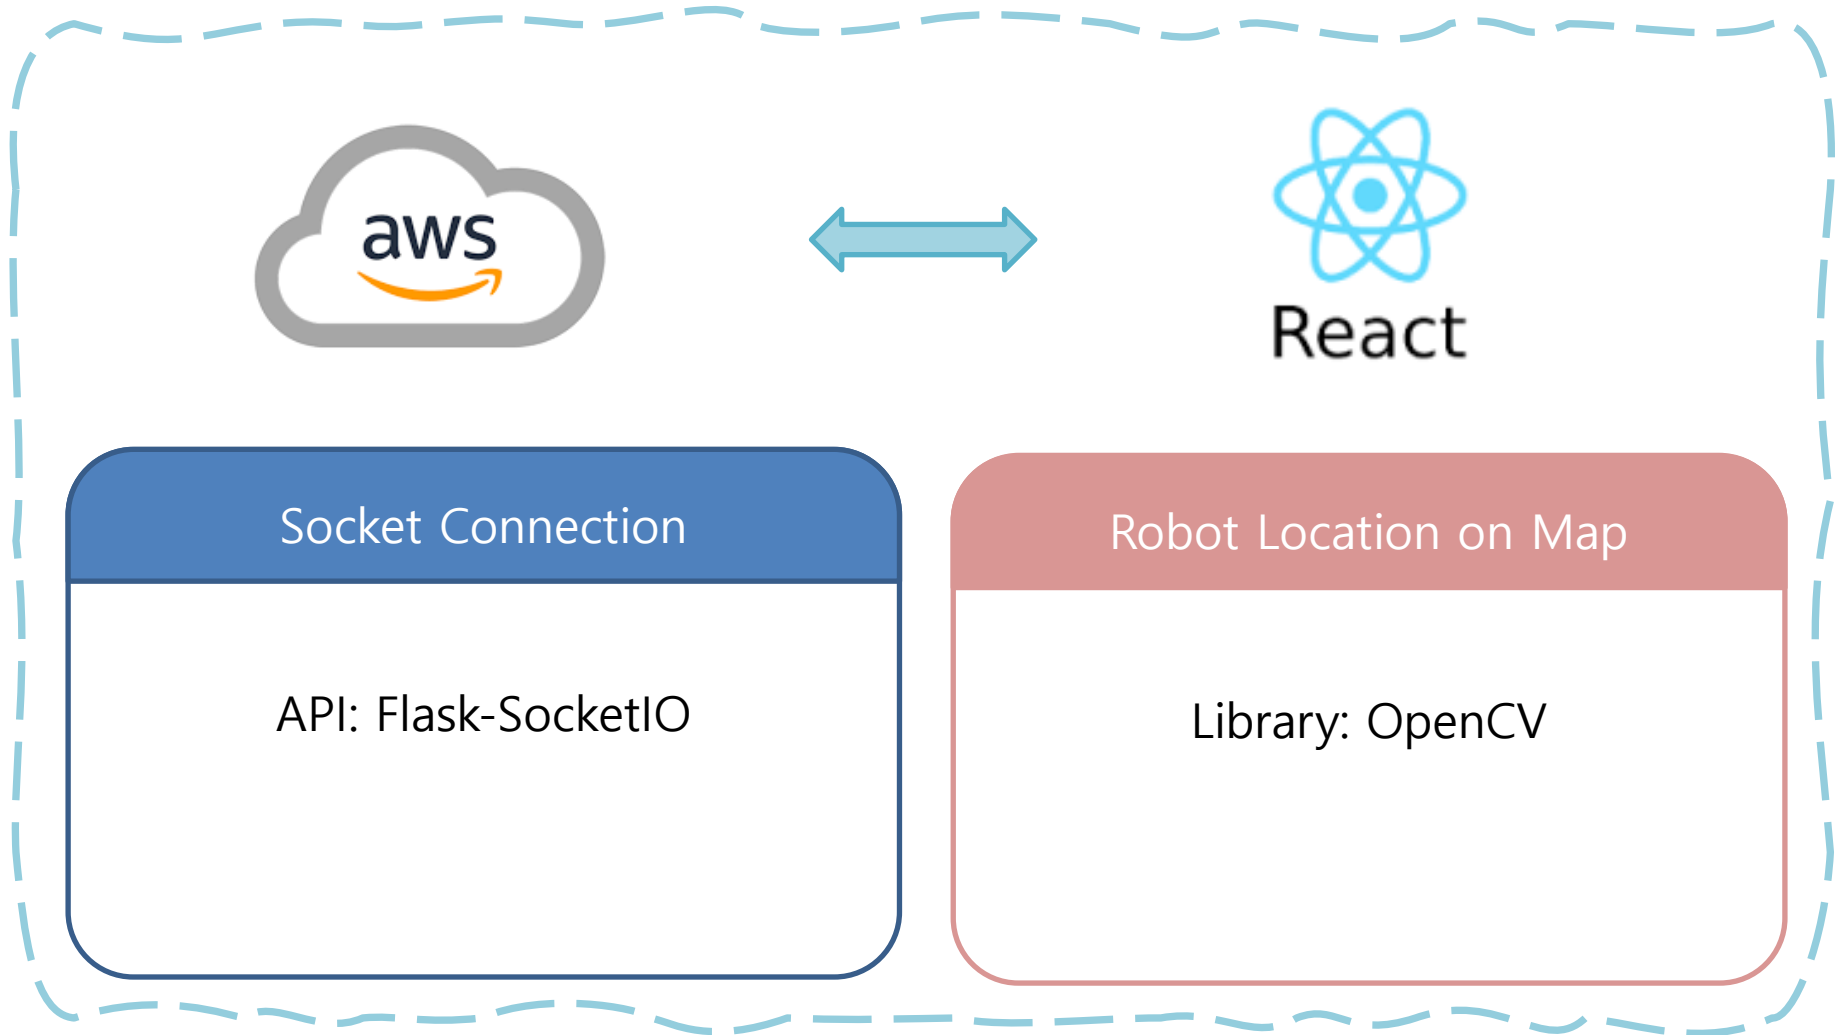

## 2 Back-End

- Emergency Capture

## 2 Back-End

- Robot Call on Socket

## 2 Back-End

### ● Future Plans

#### Robot Call Optimization

- Communicate with robot using Service

#### Connection with Admin

- Update emergency image on Database
- Connect with Admin Front-end

#### Map Image on S3

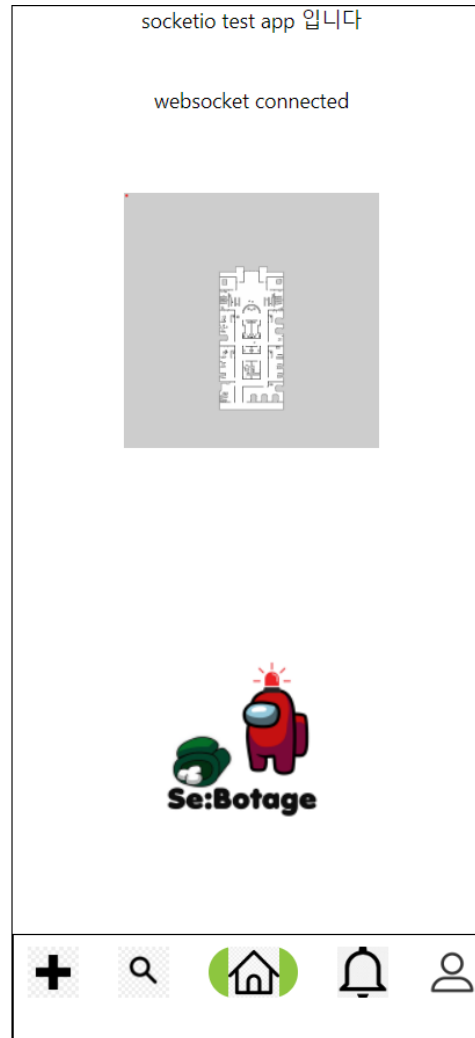

- Load map image from storage for scalability

# 3 Front-End

## ● week10-11 진행상황

Connect  
websocket API

Divide  
user/admin app

## 3 Front-End

- proxy

↔  
Connect  
Through Proxy

Flask

Port 5000

NodeJs

Port 3000

# 3 Front-End

- websocket api

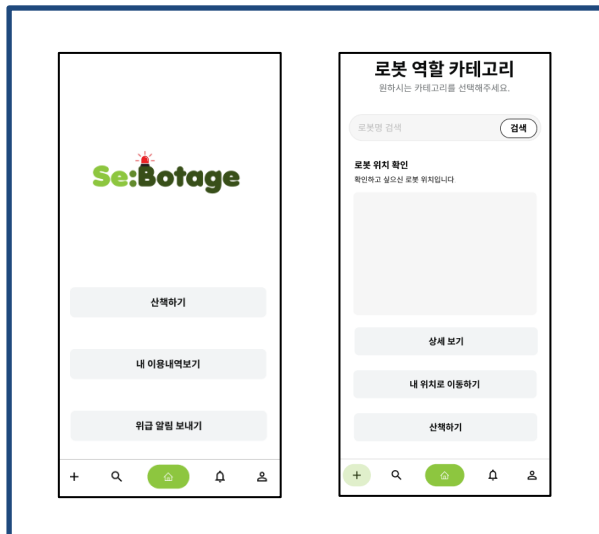

# 3 Front-End

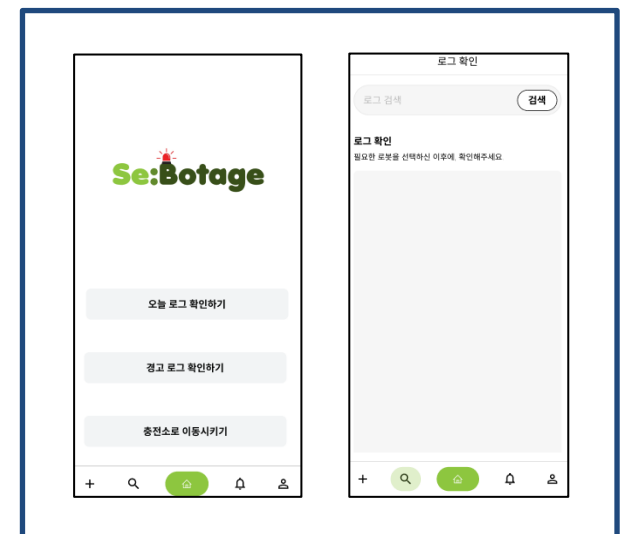

- User and Admin

Session

USER PAGE

ADMIN PAGE

# 3 Front-End

- User and Admin

USER PAGE

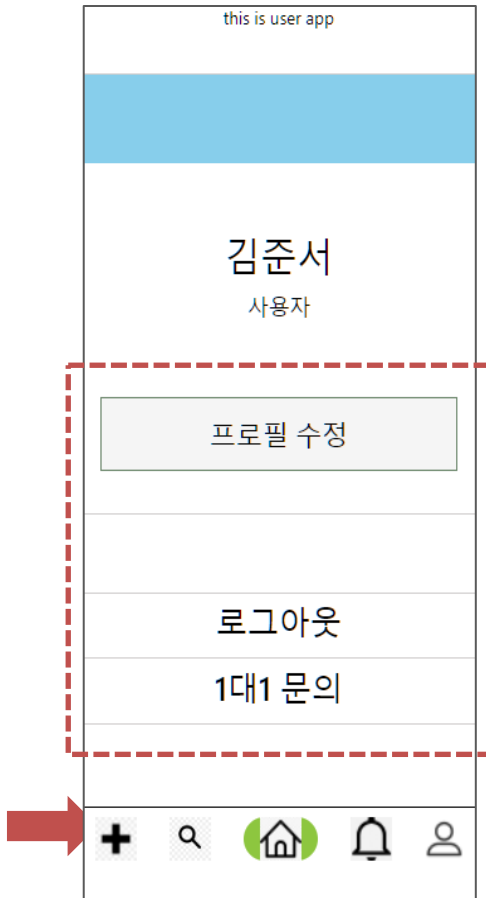

ADMIN PAGE

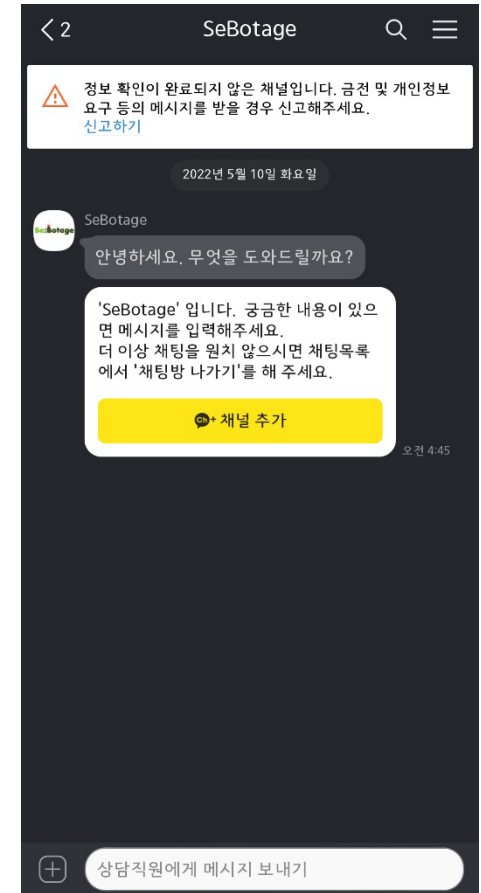

# 3 Front-End

## ● Button for Function

버튼을 누르면, 기능 작동

로그인  
로그아웃  
프로필 수정 기능 삽입

# 3 Front-End

## ● Future task

websocket into object → use single socket for entire app

fill out other page with data from websocket

- stroll assistance
- view robot log

alert for emergency detection in admin app

THANK YOU
